

# ONE BETTER AID SCORECARDS

The ONE Campaign's Better Aid Scorecards assess 21 donors on how much and how well they spend development assistance in the fight against extreme poverty.

13<sup>th</sup>

## FRANCE

### RECOMMENDATIONS

- France needs to follow through on the commitments made by Emmanuel Macron, when he was a candidate, to allocate 0.7% of GNI to ODA by 2025 as well as to hit the 0.55% milestone in 2022 - the latter having been reiterated several times since his election in 2017. These targets should also be enshrined in the revision of the development policy law.
- In order to fund these aid increases, France should allocate 100% of the proceeds of its financial transaction tax to development, and set an example to other EU member states who might soon agree to put in place a European version of the tax.
- The revision of the law should also be an opportunity to improve the targeting of aid, by setting more ambitious targets on gender equality and allocating aid to African LDCs and fragile states.

### HOW ARE COUNTRIES SCORED?

The Better Aid Scorecards rank the 20 largest bilateral OECD DAC donors, plus the European Institutions. Donor performance is assessed using a 'distance to target' approach, which looks at the distance travelled by a donor towards the different objectives, which are based on international commitments or policy targets set by ONE. Distances are expressed as the percentage of the target already achieved (ranging from 0% to 100%).

For each of the three pillars (aid quantity, targeting and quality), scores are an average of their respective indicators (equally weighted). These scores are used to rank donors for each pillar. The overall ranking is produced by assigning half of the weight to how much donors spend (50% for aid volume) and the other half to how well they spend their ODA (25% for aid targeting and 25% for aid quality). For a full description of the methodology, and to compare donors, visit: [one.org/scorecards](http://one.org/scorecards).

**FRENCH AID AT WORK**

**COMBATING MALARIA IN WEST AFRICA**

Nearly half of the world’s population is at risk of malaria, with sub-Saharan Africa continuing to bear a disproportionately high share of the global malaria burden. According to the World Health Organization, there are over 200 million cases of malaria a year – and most of these are preventable.

Role Model Caregivers (RMC) are a small group of unpaid heroes who are working to end the spread of malaria. RMCs watch over patients and monitor their usage of lifesaving mosquito nets and anti-malarial medications.

Funded by the Global Fund to Fight AIDS, Tuberculosis and Malaria, the Association for Reproductive and Family Health (AFRH) has trained 500 RMCs across 25 districts across Niger state in Nigeria. France was a founding member of the Global Fund and is the largest European donor, with a total contribution of €5 billion to date.

Everyday heroes like Hannatou Abdou have taken a lead in the fight against malaria. In her community in Danja in Niger, Hannatou has made it her life’s mission to help families in the community. Danja has a population of 6,000. Hannatou is one of 700 women from the local area who have received training to become a community health worker, and this has contributed to a dramatic fall in the number of cases of malaria. Hannatou explains: “I give myself to the community and distribute medicine to prevent malaria, so that together we can stop malaria from spreading in our villages and in our country.”

Role Model Caregiver Hannatou Abdou says, “The child of one mother, is the child of every mother...This is what drives me in the war against malaria.”
